INFORMATION TECHNOLOGY

Our nationally accredited Information Technology courses are for anyone who requires specialist skills and knowledge to administer and manage information and communications technology (ICT) support in small-to-medium enterprises (SMEs) using a wide range of general ICT technologies. Persons working at this level apply a wide range of higher level technical skills in ICT areas such as networking, IT support, database development, programming and web development.

Our graduates are eligible for student membership at Australian Computer Society (ACS). The ACS is the association for Information and Communications Technology (ICT) professionals, with a large and active membership from all levels of the ICT industry. The ACS is the public voice of the ICT profession and the guardian of professional ethics and standards in the ICT industry, with a commitment to the wider community to ensure the beneficial use of ICT. The ACS is a member of the Australian Council of Professions.

COURSE INFORMATION

Our Information Technology courses have been developed according to the requirements of the Information and Communications Technology Training Package (ICT5) and have been approved for delivery by the Australian Skills Quality Authority (ASQA). They are nationally recognised qualifications within the Australian Qualifications Framework (AQF).

STUDY PATH

Training is delivered in stages which correspond to AQF Levels IV to VI. The prescribed pathway for a qualification is for students to complete the requirements of the previous level qualification before progressing to the next level - thereby achieving more than one qualification.

Applications without the previous level qualification will be considered if they have relevant qualification and/or vocational experience. Please contact the College for more information.

We aim to equip our graduates with the necessary skills and knowledge to enable them to successfully satisfy the demands of the workplace.

COURSE DELIVERY & ASSESSMENT METHODS

Delivery and assessment strategies are selected to reflect the nature of the elements and performance criteria of the competency together with the needs and learning style of the participants. Qualifications are delivered over 20 hours per week, 16 hours face-to-face and 4 hours online learning.

Assessment methodology may include but is not limited to: observation, project/report, case study, role play, exercises, activities, and written/oral tasks including multiple choice, questions and answer, essays, tests and presentations.

ACADEMIC YEAR / START DATES

Don’t miss out on your intake dates. There are 36 teaching weeks per annum with the year being divided into 4 terms of 9 weeks each. The academic year begins in late January and ends late November. Primary intakes are at the beginning of each term.
